Oliveira de Frades, 18 April 2015

MARTIFER SOLAR CONNECTS SELF-CONSUMPTION SOLAR PV ROOFTOP PLANT IN EL SALVADOR

- Martifer Solar has connected a new solar PV rooftop plant on rooftop in San Salvador, El Salvador, which represents the company's commitment to grow the market in Central America
- The PV plant was developed Martifer Solar's local partner, DESENI and was built for one of El Salvador's leading distribution companies, DISZASA

Martifer Solar, a subsidiary of Martifer SGPS, has completed a new self-consumption solar PV plant located on a commercial rooftop in the Santa Tecla, El Salvador. The plant, with a total installed capacity of 300 kW, was developed by Martifer Solar's local partner, DESENI, and was built for one of El Salvador's largest distribution companies of consumer products, DISZASA.

Martifer Solar was responsible for the engineering, procurement and construction (EPC) services for the PV rooftop plant. The 300 kW plant, with approximately 1,000 solar panels, will produce clean energy and will lead to the reduction of the commercial facility's energy bill by up to 18% on an annual basis. With an area of 2000 m², the PV plant will produce an estimated 486 MWh/year. With this production capacity, the plant will offset 350 tons of carbon dioxide emissions annually and will provide sufficient energy to power more than 1500 inhabitants per year.

"The Salvadoran photovoltaic market is evolving and solar energy will be highly important in the energy mix of the country. Thanks to high levels of solar radiation and the number of hours of sunshine, El Salvador offers ideal conditions for generating energy from solar photovoltaic systems. There is great potential for the development of solar installations on rooftop, especially in commercial and industrial buildings," said Ismael García, Head of Business Development for Central America and the Caribbean for Martifer Solar.

Martifer Solar will continue augmenting its activities in the PV rooftop segment of El Salvador with its local partner, DESENI, and aims to implement more than 2 MW of solar PV rooftop plants for various commercial and industrial clients throughout 2015.

ABOUT MARTIFER SOLAR

Martifer Solar is a fully integrated player in the global PV market, focused on the development of photovoltaic projects, EPC and O&M.

The company is based in Portugal and has presence in Europe (Spain, Italy, Greece, Belgium, France, Czech Republic, Slovakia, UK, Germany, Romania and Ukraine), North America and Latin America (US, Canada, Mexico, El Salvador, Chile, Brazil and Ecuador), Africa (Cape Verde, Mozambique and South Africa) and Asia (India, UAE, Singapore and Japan).

The company has implemented more than 670 MW of photovoltaic energy worldwide.

Martifer Solar is part of the Martifer Group, a multinational industrial group with about 3,000 employees focused on metallic constructions and solar energy. Martifer SGPS, SA is the parent company of the Group and is listed on Euronext Lisbon since June 2007.

ABOUT DESENI

DESENI, S.A. DE CV, formerly division of the company Quantum Energy, SA Ltd, began operations in 2009 with a market survey to identify areas in which they could develop renewable energy projects, including selecting suppliers and identify potential customers.

DESENI is a company that aims to develop cost-effective solutions for its customers, using renewable energy. As a policy, each proposal submitted to customers is supported by a series of analyzes and previous studies conducted by its engineering department. With the data obtained it is in the ability to design solutions that meet the specific needs of each project.

To date DESENI has developed projects totaling 6.58 MW in Guatemala and El Salvador, in photovoltaic projects on deck floor.

Currently, the company operates in Edificio Avante, Nivel 7, Oficina 704. Calle Llama del Bosque Pte., Urb. Madreselva III. Antiguo Cuscatlán, La Libertad. El Salvador.
