Project Manager– CDI

As Voltalia's Project Manager you will work directly with the French Guiana Development Director.

Project Manager will be responsible for:

Origination of development opportunities:

- In a multi-energy, potentially hybrid with storage approach, identify potential sites in French Guiana, including isolated sites (topography, mapping, deposit data, technical or environmental constraints, connection / access, riparian areas, etc.);
- Secure the land.

Local consultation with institutional actors and elected officials:

- Present the potential of the project and convince local authorities to gather official support to authorize the development of the projects;
- Deal with every institutional actors and technical administrations that may be involved in the project (DEAL, DAAF, DAC, SDIS, Army ...) to identify objections, constraints and recommendations to be followed;
- Follow instructions of the administrative files and obtain every necessary authorization prior to project implementation;
- If necessary, lead public meetings to present the project, federate stakeholders to facilitate the implementation of the project.

Realization of feasibility studies:

- Evaluate and secure potential energy deposits from measurements of energy potential (hydro, solar, wind) or secure a biomass supply plan;
- Determine technical characteristics of the project according to economical and natural constraints (technological choices and sizing);

At Voltalia we are passionate about **renewable energies**! We are an electricity producer from wind, solar, hydro and biomass, and also a service provider to 3rd party clients such as **Development, EPC, O&M and Distribution**.

Today we are in **18 countries, split among 4 continents**, and offering a **global operating capacity** to our clients. We are listed on the regulated Euronext market in Paris since July 2014.

If you share our ambition and our passion for renewable energies, Voltalia has a career for you!

Announcement Date: 28-05-2018
